Abdulrahman Saeed Elshafie

Software Engineer with a Marketer's Eye for User-Centric Solutions | Built AI-powered System Mimicking Human Eyes | Python Developer at PioneersNow Inc | AI, Data Science, Python, Django, Flutter
6th of October, AI Jizah, Egypt

Summary

My journey began in digital marketing, where I honed my skills in understanding customer insights and translating them into actionable strategies. This experience sparked my passion for building user-centric solutions, leading me to transition into software engineering.

With experience in both marketing and software development, I bring a unique perspective that combines analytical thinking with technical expertise. I'm passionate about creating intuitive and efficient backend systems that enhance user experience. Some of the projects I've worked on include:

- - : Developed an advanced system utilizing AI to replicate human vision, pushing the boundaries of what's possible in machine learning and artificial intelligence.
- : An AI-powered note-taking app designed to revolutionize how users interact with their notes. NoteR includes features like NoteChateR, NoteRecommendeR, and NoteSearcher, which leverage AI to enhance note-taking, organization, and retrieval.
- () : Analyzed unbalanced data to identify patterns of electricity and gas theft, utilizing Scikit-learn to improve machine learning model performance and handle imbalanced datasets effectively.

I'm continually expanding my skill set, currently deepening my knowledge of Django, AI, and Flutter to enhance my development capabilities. My commitment to continuous learning ensures that I stay at the forefront of technology and best practices.

I'm eager to bring my blend of marketing insight and software engineering expertise to a dynamic, growth-oriented team. Let's connect to explore how my background can contribute to your organization's success.

Experience

PioneersNow Inc

Python Developer | Django, Django rest framework, Deep Learning, Docker

August 2024 - Present (6 months)

Cairo, Egypt

- Design, implement, and maintain backend architecture using Python
- Integrate machine learning models into backend systems.
- Develop and optimize RESTful APIs to facilitate data processing and model deployment.
- Work with cross-functional teams to understand product requirements and translate them into technical solutions.
- Contribute to the architecture roadmap, identifying opportunities for improvement and innovation

Freelance

Freelance SEO Specialist & WordPress Developer | SEO, WordPress, Web Development

January 2024 - May 2024 (5 months)

I worked on 2 projects to build the structure of 2 websites, one was an E-commerce website named El-Empiro here: <https://elempiro.com/>

The other was a website for architecture company named mydesing3d here: <https://www.mydesign3d.com/>

Techmart

SEO & Google Ads Specialist | SEO, Google Analytics, Keyword Research, WordPress

May 2023 - January 2024 (9 months)

Giza, Al Jizah, Egypt

- Researching new advertising opportunities and providing recommendations to management on which ones are best for the company's goals
- Analyzing performance data to identify trends and patterns in order to improve campaign effectiveness
- Monitoring competitor activity in order to identify any new strategies that may affect business goals
- Executing advertising campaigns across various channels such as search engines, social media platforms, or mobile devices
- Partnering with other departments to ensure that all advertising campaigns meet objectives set by other departments such as sales or leads generated

- Creating and managing landing pages and conversion tracking tools such as Google Analytics to measure campaign effectiveness
- Creating reports detailing campaign results and making recommendations for future campaigns
- Analyzing customer data to identify potential customers who may be interested in the company's products or services
- Collaborating with other team members to develop strategies to improve website traffic and sales

Freelance

Freelance Junior Digital Marketing Specialist | SEO, Content Marketing, Social Media Marketing

November 2022 - January 2024 (1 year 3 months)

Cairo, Egypt

Worked on projects to plan, and implement content marketing for an Architecture company, and wrote the website blogs and social media posts as well.

BambooGeeks

Machine Learning Intern | Machine Learning, NLP, Computer Vision, Tensorflow, JAX

June 2023 - July 2023 (2 months)

Cairo, Egypt

Successfully completed a 4-week intensive ML Academy program, focusing on both foundational and practical machine learning skills. Gained hands-on experience in building and training models using classical ML techniques, TensorFlow, and JAX.

During the program, I worked on a comprehensive project that included extensive exploratory data analysis (EDA) and data preprocessing. The dataset was highly unbalanced and contained numerous issues, which I effectively addressed to ensure data quality. I developed and trained multiple machine learning models, achieving an impressive accuracy, precision, and recall score of 0.85. This project not only honed my technical skills but also strengthened my problem-solving abilities in real-world data scenarios.

ViciTech

Digital Marketing Specialist | Automation, Google Analytics, Content Writing, Social Media Marketing

July 2022 - October 2022 (4 months)

Cairo, Egypt
